

## **ENVIRONMENTAL POLICY - SECURITY COMMUNICATION**

Ascom Security Communication aims for complete customer satisfaction by delivering products and services that fulfill customer requirements, expectations of environmental aspects and ensures that all our processes and products impact the environment as little as possible.

- We continuously work at improving the environmental sustainability and security of our products and services.
- We also satisfy the other stakeholders - our share holders, our employees and society as a whole by complying with environmental laws and regulations that are applicable to our area of business.
- We know the risks of possible emergency and accident situations and take appropriate precautions.
- We encourage safety and security and environmental awareness in our employees.
- We use raw materials, energy and water as economically as possible.

### **Security Communication environmental goals for 2011/12**

- Security Communication employees are requested to use tools such as video and phone conferencing in general and wherever possible to avoid travelling.
- Security Communication employees are encouraged to use public transportation for commuting and for business travel.
- Publications (internal and external) have to be made available in an electronic format in order to minimize printing and paper usage.
- Employees are requested to print only electronic documents if necessary. Internal presentations shall be printed in black and white only.
- As a general principle all waste shall be reduced to a minimum.
- All non-hazardous waste (e.g. paper, PET, aluminum) shall be recycled to the extend it is possible according to local preconditions.
- Security Communication actively offers its customers the ability to recycle old devices.
